

DARK WATER IPO, LLC.

Your investment and purchase of an AKC (American Kennel Club) registered **Dark Water IPO (Der Dunklen Wasser), LLC** pup assures that you have purchased a quality bred pup. We choose breeding's seriously seeking to maintain the high standards of each breed. Your working line pup will be able to excel in AKC or other dog sports such as Schutzhund and/or, as a personal companion dog. However, genetics alone does not mean your pup will be able to perform at the level you envision. While great genetics and a solid pedigree are necessary it is only one third of the total puzzle. There is no substitute for a healthy environment for your new furry friend. Your pup will learn more from 8 weeks to 8 months than any other phase of its 10-12-year life. It is impossible to overstate the importance of this life stage of your pup. With that said it is important you gain a clear understanding of just what you envision for your pup when it is mature. Our pups/dogs are best suited for an active lifestyle. Most behavioral problems are due to broaden, lack of exercise, and lack of mental stimulation. A tired dog is a happy dog. Our breeding's are of working lines thus give it a job. At least make it think it has a job! It is good practice to expose your pup to many new sites, sounds and environments. However, in these situations make sure your pup is not overly frightened. Some things are best in small amounts at a time. This leads natural into the third part of the equation. Other than genetics and environment your pup will benefit from training. In fact, you will begin training your pup from day one. As your pup grows and matures you may- based on your vision for your pup- want to seek out an experienced trainer.

Guarantee: To the best of my knowledge your pup is healthy.

- 1) Your pup is a pack animal and above all else needs a pack leader. That's you!
- 2) Beware, if you treat your pup like a human then he will treat you like a dog.
- 3) Seek to enter into the dog's world before you demand he come into yours.
- 4) All dogs seek one thing (inscribe this on your brain). How can I improve my experience? It is not his love for you. It is the treat in your pocket. Do not be upset by this. It is the same with humans!
- 5) Always be firm yet fair with your dog.
- 6) Give commands and not requests.
- 7) Build a bond with your dog and you will understand how true the saying, "dog is man's best friend." Humans would not evolve to who we are had it not been for the dog. The dog does not owe us but rather humans are indebted to the canine.
- 9) If you are a pet parent chances are your dog will cost more than it is worth!
- 10) Never underestimate your dog's ability to smell!
- 11) If you don't believe your dog can count then just give him two of the three treats in your pocket!
